FAMILY GUIDE

Tips, insights and resources from these leading education and youth-serving organizations to help you harness the power of summer learning.
The brain’s capacity to learn is astonishing. Summer learning isn’t about just adding more things to your already full to-do list... Summers are a particularly good opportunity to take into account our children’s interests and likes -- building activities around what our children enjoy or want to explore is essential to creating positive summer learning experiences.

Excerpt from Summers Matter; Mathew Boulay, PhD - Founder, National Summer Learning Association

DISCOVER SUMMER.

Summer has arrived. The National Summer Learning Association (NSLA) invites you to visit DiscoverSummer.org—a new online destination, developed in response to COVID-19, to help families discover affordable summer programs, summer meals, parent tips and a sea of resources to keep kids learning, earning, safe and healthy this season.

This summer will be more important than ever in helping our nation’s young people recharge, reconnect with peers, and rediscover the joy of learning. As the nation slowly emerges from this pandemic, we know from recent research that parents just want their kids to be kids this summer, while also finding ways to give them a strong start to the school year ahead. Go ahead... discover the joy of nature, the arts, STEM, or reading and math (skills that children may lose ground in each year without practice).

In this Family Guide, you will find helpful tips and information related to summer enrichment and learning from leading education and youth-serving organizations. Visit DiscoverSummer.org and explore!

The “Summer slide” is what often happens to disadvantaged children during the summer months. They tread water at best or even fall behind, while higher-income children build their skills steadily over the summer months.

Research shows the high-quality summer programs can make a difference in stemming learning loss and closing the country’s educational and opportunity gaps.
Before school is out, ask the teacher which skills are most important for your child to work on over the summer. You can also use the Readiness Check to know how your child is doing with grade level math skills and get connected to fun, easy-to-use summer learning resources to help your child practice these skills every day.

2 REconnect with what matters

Who is your child most excited to spend time with? What interests your child? What makes them light up with confidence? Find out and lean into it this summer. This will help keep your child motivated to learn. For example, to build communication skills, invite your child and their friends to do a “write and tell” to share what they missed most about each other.

3 REfect on progress

Share what you notice about your child’s progress with tutors, summer program leaders and new teachers in the fall. For example, “My 4th grader needs support with word problems that involve multiplication and division.” You are the expert on your child. Teachers need your insights and questions.

With the arrival of the COVID-19 pandemic came many questions from parents/guardians about what camp would look like in summer 2021.

**COVID-19 AND SUMMER 2021**

With the arrival of the COVID-19 pandemic came many questions from parents/guardians about what camp would look like in summer 2021.

**QUESTIONS TO ASK:**

1. What is your camper drop-off/ pickup policy?
   
   Drop-off and pickup might look different this year than it has in years past. To limit exposure, your camp may have implemented a new policy regarding how many people can be at camper drop-off/pickup. Make sure to ask if there have been any changes.

2. Are you changing your staff time-off policies?
   
   Previously, summer camp staff would be able to go off-premises during their time off and between sessions. Ask your camp director if any changes have been made to those policies to help minimize exposure risk.

3. What conversations are you having with your staff around what will be different this summer?
   
   Most camp directors are looking at ways they can reduce exposure this summer, which may include limited group activities, changes to mealtimes, and more.

4. What are some things you aren’t doing this summer that you have done in the past?
   
   Some special camp events may not be possible this year due to local restrictions or safety concerns.

This resource of questions and considerations was put together with aid from camp directors across the U.S. to help guide parents in their conversations with camp directors about the upcoming summer.
EMOTIONAL HEALTH CHECK-INS DURING COVID-19

The top priority of the whole country right now is to stay healthy. And while we recognize that right now physical health is the biggest focus, a kid’s emotional health is just as important. Try to incorporate these emotional check-ins into your daily schedule of activities. Give them a chance to think, then share their mood. They can choose to explain and elaborate on their feelings, or not.

INTERNAL WEATHER REPORT: Ask your children, “If your mood were the weather, what would it be?” For example, if you’re angry it could be a thunderstorm, or if you’re happy it could be sunny.

FEELINGS 1-10: Ask kids, “Rank your mood today on a scale of 1 to 10, with 1 being the worst mood and 10 being the best.”

POP CULTURE: Ask youth, “If your current mood were a song or movie, what would it be?” For example, if you’re having a great day your song could be “Happy” by Pharrell, or if you’re grumpy your movie could be “The Grinch.”

HIGHS & LOWS: Ask youth to think of their “high and low” of the day – this is the best thing that they experienced during the day, and the worst thing that they experienced during the day.

ROSE, BUD, THORN: Ask youth to think of their “rose, bud, and thorn” of the day – this is the best thing that happened to them during the day (rose), something they’re looking forward to (bud), and the worst thing that happened to them today (thorn).

Ultimately, it’s important for children to know that it is OK to feel how they are feeling – everyone experiences a range of emotions every single day. It’s normal to feel sad, excited, angry, calm, or nervous every day, multiple times a day. What matters is how youth cope with these feelings, especially during times of uncertainty.
Summer is a great time of year to enrich and inspire youth and prepare them for the school year ahead. **Click on the resources below to discover the joy of learning in STEM, the outdoors, the arts, career readiness, and academics!**

Creating Smarter Summers, Brighter Futures

The National Summer Learning Association (NSLA) is a national, non-profit organization whose mission is to convince, connect, and equip program providers, education leaders, families, and communities to deliver high-quality summer learning opportunities to our nation’s children and youth in order to help close the achievement and opportunity gap and support healthy development.
